

**DEFIANCE COUNTY  
REQUEST FOR PROPOSALS (RFP)  
TECHNOLOGY AND MISCELLANEOUS SYSTEMS  
MAINTENANCE SERVICES  
ADDENDUM #1**

Maintain existing and establish new telephone, video, security, access control systems and low voltage network or structured wiring.

Defiance County is looking for a vendor to maintain the existing systems listed in the RFP documents. This will entail the following:

Working with County's IT personnel and outside vendor to solve issues pertaining to the systems listed in the RFP.

Run any networking cables as needed, installs ends and connects hardware to network and systems.

Oversees and directs the operation of the countywide phone and voice mail systems (arranges for service when needed to ensure 24/7 operation of the systems; receives and attempts to resolve complaints; provides training, recommends and implements upgrades and changes; ensures the security of the system, etc.)

Maintain and troubleshoot a gigabit fiber optic system between buildings.

Maintain and troubleshoot central video recording systems.

Maintain and troubleshoot access control systems.

At this time, there is no new equipment we are looking for. If the time comes for that, we will ask you to research and get quotes on said equipment.

If you need further specifications on the equipment, please be sure to attend the walk thru on September 12<sup>th</sup> at 10:00 a.m. All other questions will be addressed then.
